Red Rocks Data Center Increases Bandwidth Capacity

MORRISON, Colo. (March 25, 2008) – Red Rocks Data Center announced today it has installed fiber optic cabling that will allow the center’s clients to depend upon an additional 12 gigabits per second of bandwidth at the NASA-built facility.

Red Rocks converted the former NASA satellite uplink center into a data center that offers its clients top security, disaster recovery and cost efficiency. Now thanks to its new fiber, Red Rocks also offers greater redundancies for seamless repairs, improved networking abilities and the lowest prices among the top data centers in the Denver area.

“While providing our customers with the most up-to-date equipment and expertise, we have also minimized unnecessary additions to the data center’s infrastructure,” said Tom Nats, president of Red Rocks Data Center. “That approach has allowed us to keep our prices low for our customers.”

Since choosing Qwest’s Metropolitan Optical Ethernet Ring (QMOE) as its infrastructure for data transport, Red Rocks Data Center can now offer Internet services to Denver-area businesses. The Ethernet network provides connectivity between local area networks (LANs) in support of high speed data, voice over IP and video, meaning customers receive higher quality service at lower rates. For instance, a customer who purchases 10 megabits per second of bandwidth will pay only \$1,200 per month, about half the market’s common rate.

About Red Rocks Data Center

Morrison, Colo.-based Red Rocks Data Center, founded in 2006, offers computer equipment collocation, managed hosting, Internet connectivity and disaster recovery solutions for businesses of all sizes. Originally constructed by NASA, the Red Rocks Data Center facility offers security and scalability in a unique rural environment that is conveniently located to Denver’s urban commerce. Red Rocks Data Center offers the

most reliable information technology (IT) service for clients who prefer to focus their energy, resources and manpower on their basic business operations and leave the computer problems to us. Call 303-588-2155 or go to www.RedRocksDataCenter.com.
